The Vine Chandelier

Proudly Made in Vermont

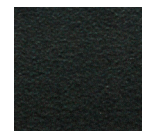

An eye-catching beacon in our retail locations, by popular demand, we now offer the Vine Chandelier for the home.

Inspired by clusters of grapes growing from vines in the South of France, Simon Pearce Head of Design + Product Development James Murray created the now-iconic chandelier silhouette that lights the Simon Pearce Bar at Quechee. Each glass globe is handcrafted by our master glassblowers, thus creating a truly unique and one-of-a-kind piece.

In partnership with the Modern American Blacksmiths of nearby Hubbardton Forge, this handcrafted light fixture is designed to illuminate your dining table, kitchen island or entryway in beautiful handblown glass and hand-forged metal. With a commitment to quality and craftsmanship, each piece is made to order.
